

GRAPPA invites trainees and junior faculty—assistant professor level, medical/non-medical PhD students, junior post-docs, residents, and fellows—to submit proposals to GRAPPA to fund pilot projects related to psoriasis or psoriatic arthritis. Projects can be in any branch of science: laboratory based, clinical, or epidemiological. While applicants need not be GRAPPA members, they should demonstrate an interest in research related to either psoriasis or psoriatic arthritis.

GRAPPA will provide support for up to four projects this academic year:

- three (3) projects for \$25,000 each
- one (1) rheumatology-dermatology collaborative project for \$35,000

Applicants should submit a 3-page proposal (maximum) including a short project description and a detailed budget. They should also include a curriculum vitae and a support letter (pdf) from their project supervisor, Chairman or Division Chief.

Submit proposals to Sharon Andrews, [sharon@grappanetwork.org](mailto:sharon@grappanetwork.org).

Proposals are due on April 1, 2020. Awardees will be notified in early June.
